

ATHL Core Products (High-Level)

ATHL Core Products (High-Level)

Phases:

Phase 1 - These are non-negotiable. Nothing else matters without them. They are required to operate reliably.

"Can a real fan safely buy a real athlete's token with real money?"

Outcome:

- Fully compliant MVP
- Real money in → token purchased → token held
- Small but real user base

Products:

1. Identity, Access & Trust
 - a. Social login & authentication
 - b. Account Roles & Permissions (Fan / Issuer / Admin)
 - c. User Verification - Basic KYC / verification
2. Onboarding & User Activation
 - a. Account creation
 - b. Issuer onboarding (basic)
 - c. Fan onboarding (basic)
 - d. Mandatory disclosures

3. Wallets & Payments
 - a. Custodial wallets
 - b. Fiat Payments: Stripe fiat on/off ramps
 - c. Internal ledger (credits / debits)
4. Token Issuance (MVP)
 - a. Token minting

Issuer Token Configuration

1. Marketplace & Trading (MVP)
 - a. Primary market (buy from issuer)
 - b. Basic pricing logic
 - c. Transaction settlement
2. Platform Infrastructure (Core)
 - a. Database & event tracking
 - b. APIs & Services
 - c. Audit logs
3. Social Engagement Layer
 - a. Creator Profiles

Phase 2 - Growth, improve liquidity, retention, and creator value.

THIS IS WHERE WE SHOULD ADD DECENTRALIZED / ISSUER PREDICTION MARKET

Outcome:

- Higher retention
- Stronger creator incentives

- More liquid marketplace
- Clear product differentiation

Products:

1. Marketplace & Trading (MVP)
 - a. Primary market (buy from issuer)
 - b. Basic pricing logic
 - c. Transaction settlement
2. Infrastructure (Core)
 - a. Data Pipelines & Warehousing
3. Admin & Control Room
 - a. User & Issuer Management - Phase 2
 - b. Token Controls - Phase 2
 - c. Platform Health Monitoring - Phase 2
 - d. Manual Overrides & Escalations
4. PlatformToke Issuance
 - a. Compliance & Approval Process
5. ~~ATHL Coin & Platform Economy~~
 - a. ~~Rewards & incentives~~
 - b. ~~Fee mechanics~~

Secondary Marketplace & Advanced Trading

1. Secondary Market
2. Pricing & Liquidity Controls
3. Price discovery improvements
4. Social & Engagement Layer
 - a. Creator profiles

5. Analytics, Leaderboards & Insights

- a. Public Leaderboards
- b. Creator Analytics
- c. Fan performance insights

6. Risk, Compliance & Security (Advanced)

- a. Transaction monitoring
- b. Account freezing & recovery

7. Prediction Markets see: <https://speedrunethereum.com/challenge/prediction-markets>

- a. Liquidity Provider - sets up market and seeds it with ETH (or ATHL?)
 - i. FanToken issuer deposits ETH or ATHL or USDC as collateral
 - ii. Smart Contract creates "Yes" and "No" Tokens
- b. Token Minting
 - i. Smart contract mints tokens and adds to liquidity pool
 - ii. Tokens locked to simulate probability
- c. Oracle - reports the final outcome (yes or no)
 - i. Many types of oracle implementations available
 - ii. Optimistic oracles, like UMA (used by platforms such as Polymarket), assume data is correct unless disputed. Alternatively, decentralized oracle networks like Chainlink aggregate data from multiple sources to increase reliability.
- d. User Actions:
 - i. Buy outcome (yes/no) tokens
 - ii. Sell them to exit positions
 - iii. Redeem them once results are in

Phase 3 - These are power features, not blockers.

"How does ATHL become hard to copy?"

Outcome:

- Strong network effects
- Deep user lock-in
- Platform moat

Products:

1. Platform Infrastructure
 - a. Ecosystem & Integrations
2. Admin & Control Room (Internal)
 - a. Advanced Admin & Control Room
3. Social & Engagement Layer
 - a. Fan Interactions
 - b. Activity feeds
 - c. Gamification
4. Analytics, Leaderboards & Insights
 - a. Personalized Leaderboards
 - b. Creator Analytics
 - c. Platform Analytics

Platform Infrastructure (Backend Foundations)

Products:

Database & Event Store - Phase 1

APIs & Services - Phase 1

Data Pipelines & Warehousing - Phase 2

Audit Logs - Phase 1

Ecosystem & Integrations - Phase 3

- External marketplaces
- Partner APIs
- Cross-platform integrations

Admin & Control Room (Internal)

Purpose: Operate and control ATHL platform, features and users.

Products:

User & Issuer Management - Phase 2

Token Controls - Phase 2

Platform Health Monitoring - Phase 2

Manual Overrides & Escalations - Phase 2

Advanced Admin & Control Room

Purpose: Help ATHL platform admin with advanced and automated control tools to allow scale .

Products:

Predictive alerts - Phase 3

Automated risk responses - Phase 3

Ops optimization tooling - Phase 3

Identity, Access & Trust

Purpose: Establish trusted users and compliant accounts across the platform.

Products:

Social Login & Authentication - Phase 1

- OAuth (Google, Apple, X, etc.)
- Email / password fallback

Creator Identity Verification - Phase 2

User Verification - Phase 2

- Identity verification (KYC)
- Age / jurisdiction checks

Account Roles & Permissions - Phase 1

- Fan
- Issuer (Athlete / Creator)
- Admin / Ops

Onboarding & User Activation

Purpose: Convert new users into active participants with minimal friction. This is a growth product, not just a form flow.

Products:

Account Creation - Phase 1

Onboarding Funnels - Phase 1

The Onboarding Funnel is a cross-cutting growth and risk mechanism that applies to *all* users, regardless of role.

- Progressive profiling
- What do we collect?

Issuer Onboarding - Phase 1

- Profile creation
- Token eligibility checks
- Compliance approval flow

Fan Onboarding - Phase 1

- Wallet setup (custodial)
- First purchase guidance

Mandatory Disclosures - Phase 1

Wallets & Payments

Purpose: Allow users to move money in and out of ATHL safely and instantly. This is where ATHL becomes a fintech platform.

Products:

Custodial Wallet System - Phase 1

- Fiat balances
- Token balances
- A-Bucks

Fiat Payments - Phase 1

- Stripe (ACH, cards)
- Loading / unloading funds

Internal Ledger - Phase 1

- Credits / debits
- Fees, rewards, refunds

User Dashboards

Creator Dashboard

Fan Dashboard

Blockchain & Smart Contracts

~~ATHL Coin & Platform Economy~~

~~**Purpose:** Power the internal economy and incentivize activity.~~

~~**Products:**~~

~~ATHL Coin - Phase 2~~

- Utility token
- Fee discounts, rewards, governance (future)

~~Incentives & Rewards - Phase 3~~

- Engagement rewards
- Referral rewards

Token Issuance (Creator / Athlete Products)

Purpose: Enable athletes and creators to tokenize themselves. This is the “Shopify for people” layer of ATHL.

Products:

Token Minting - Phase 1

- Supply definition
- Pricing model

Issuer Token Configuration - Phase 1

- Metadata
- Utility definitions
- Fixed supply definition

Compliance & Approval Flow - Phase 2

- Manual / automated review

~~Governance & Advanced Token Utility - Phase 3~~

- ~~ATHL Coin governance~~
- ~~Community voting~~
- ~~Creator fan governance models~~

Marketplace & Trading

Purpose: Enable buying, selling, and price discovery. This is ATHL’s exchange without calling it an exchange.

Products:

Primary Market - Phase 1

- Initial token sales

Secondary Market - Phase 2

- Peer-to-peer trading
- Order matching logic

Transaction Settlement - Phase 1

Pricing & Liquidity Controls - Phase 2

- Floors, ceilings
- Order limits
- Anti-manipulation logic

Social & Engagement Layer

Purpose: Turn financial activity into community and fandom. This is what keeps ATHL from becoming “just another trading app.”

Products:

Creator Profiles - Phase 1

Fan Interactions - Phase 3

- Follow
- Comments / reactions

Activity feeds - Phase 3

Gamification - Phase 3

- Leaderboards
- Badges, streaks, milestones

- Dynamic challenges

Analytics, Leaderboards & Insights

Purpose: Drive engagement, transparency, and ops decision-making.

Products:

Public Leaderboards - Phase 2

Personalized Leaderboards - Phase 3

Creator Analytics - Phase 3

- Token performance
- Fan engagement

Platform Analytics - Phase 3

- Growth, liquidity, risk

Risk, Compliance & Security

Purpose: Protect users and the platform from malicious activities.

Products:

Fraud Detection - Phase 3

Transaction Monitoring - Phase 2

Content Moderation - Phase 3

Account Freezing & Recovery - Phase 2
